

## SERVICES AVAILABLE

### Leak Detection

Using advanced technology to detect water leaks (not accidental spills)

### Around the clock

Our sensors work around the clock to notify you & others of a serious water leak

### Detecting temperatures

Also detects low temperatures and warns you of potential freezing

### Notifications

We send notifications to both unit owners and property management via centralized management.

### Other options

We can shut off the water when a leak is found.

- ✔ No risk tryout with pilot program
- ✔ Very low upfront cost, minimal recurring fees
- ✔ Potential insurance savings

## Water detection services that work for you

- Property managers and owners are notified immediately of water leaks.
- Leak Alerts are on your cell phone and can be notifications, text messages or emails.

### Benefits:

- Quick action taken by owners or management can reduce any water damage.
- Insurance claims are reduced, lowering the premiums
- With reduced damage, you don't have common areas shut down for months, waiting for repairs.
- Less aggravation for everybody
